State Permit Draft & Publication Notice

Dear Mr. Fernow:

The enclosed state waste discharge permit draft is for the renewal of Permit No. 5162. Please carefully review the draft and submit any questions or comments that you or the plant manager, Mr. Ken Roan, have to me either by phone or in writing.

In the event there are no comments, enclosed is an advertising notice describing your existing waste discharge. You must have this notice published once a week for two consecutive weeks in a newspaper of general circulation in the locality in which the discharge is occurring. This is to give the public a chance to be aware of, and comment on industrial waste discharges.

Once the notice is published, you must obtain an affidavit of publication from the newspaper and send it to the Northwest Regional office of the Department of Ecology, as proof of publication. No waste discharge permit will be issued until this affidavit is received.

Thank you for your assistance in this matter.

Sincerely,

A handwritten signature in cursive script that reads "Barbara Smith".

Barbara Smith
District Inspector
Environmental Quality
